**Summary:** I am a full stack engineer with almost eight years of experience developing enterprise software and over twelve years of experience as a programmer. I have experience with various languages on multiple platforms with responsibility for the entire development and lifecycle of the products I develop. I am currently seeking a mid-to-senior level full-time software engineering position.

## Experience

Senior Software Engineer – Broadbean Technology (CareerBuilder) February 2015 – present  
Irvine, CA

- My most recent work to date has been assisting in architecting and developing an analytics product utilizing Angular 6, Typescript, Node.js, HTML, CSS, Karma/Jasmine, Perl, Linux, MySQL, and Jenkins.
- Responsible for architecting, developing, maintaining, and supporting new features within a RESTful API-based dashboard product using Perl, Linux, MySQL, Redis, HTML, CSS, Bootstrap, AngularJS 1.x, Bash, Elasticsearch, Apache, Git, Vagrant, and Jenkins.
- Worked closely with project, product, and development managers in task specifications and meeting stakeholder goals.
- Led and assisted team members working under me.
- Trained new junior developers in modern Perl and Javascript tools and practices.
- Assisted in interviewing and evaluating new potential team members.

Software Engineer – Broadbean Technology April 2013 – February 2015  
Newport Beach, CA

- Responsible for architecting, developing, maintaining, and supporting a big data analytic product on the entire technology stack using Perl (with Dancer, dzil, Perlbrew), Linux, MySQL, PostgreSQL, AWS, HTML, CSS, jQuery, Bash, nginx, and Git.
- Worked closely with project, product, and development managers in meeting product goals.

Integrations Developer – Broadbean Technology February 2011 – April 2013  
Newport Beach, CA

- Responsible for building and maintaining API integrations for thousands of job boards utilizing Perl.
- Responsible for development, maintenance, and support utilizing Perl, Linux, MySQL, HTML/CSS, Javascript, Bash, Subversion, and Apache in coordination with other developers in Sydney and London.
- Worked closely with client services in resolving client issues.

Contract Web Developer December 2006 – February 2011  
Irvine, CA

- Was contracted on assignments that related to web design and programming of client websites.
- Utilized PHP, MySQL JavaScript, HTML, CSS, and VBScript.

## Technical Skills

Languages: Perl, Javascript, TypeScript, Python, HTML5, CSS3, Bash, Java, PHP, C, C++

Operating Systems: Linux, Mac OS X, FreeBSD, Windows

Databases: MySQL, PostgreSQL, Redis, SQLite

Version Control: Git, Subversion

Server-side: Amazon Web Services (EC2, RDS, S3, Elasticache, Elasticsearch, and Redshift), nginx, Apache

Deployment: Jenkins, Bitbucket Pipelines, TravisCI

## Projects

Teelicio.us (Teelicious)

June 2018 - Present

Graphic t-shirt aggregator that allows users to track their favorite tees and shops from various sites such as (but not limited to) RedBubble, Society6, Threadless, Etsy, and Storenvy. The bulk of the codebase consists of two RESTful API's (a third is currently being developed) and two Angular applications. MVP launched as of late December 2018 and is currently in demo mode (only one shop available at the moment).

Technical Stack:

Perl (Mojolicious), Python (Flask), Typescript, Angular 6/7, Node.js (currently in development with Express), HTML5, Sass/CSS 3, MySQL, Ubuntu Linux (Xenial), Redis, nginx, AWS (EC-2, RDS, S3, Elasticache, and exploring the use of Elasticsearch), Jenkins

## Education

University of California – Irvine  
Irvine, California

September 2006 – December 2010

- Completed my Bachelors of Art degree in Film and Media Studies.
